

# Installation of MySQL on Ubuntu 22.04 LTS

**Follow the instructions and use the commands given below on the terminal of Ubuntu 22.04**

1. Open terminal, then run the below command to update packages.

```
sudo apt-get update
```

2. Now, install mysql server using the below command:

```
sudo apt-get install mysql-server
```

3. Type 'Y' and hit enter.

4. After installation is complete, then verify by running below command.

```
sudo systemctl status mysql
```

## Post MYSQL installation steps on Linux

**1. Connect to the mysql server using**

```
sudo mysql
```

**2. Now change the password of user root.**

```
ALTER USER 'root'@'localhost' IDENTIFIED WITH  
mysql_native_password by 'PassWord@123';
```

**3. Now run the secure installation application.**

```
sudo mysql_secure_installation
```

**4. Now, enable to auto-start the MySQL service whenever Linux machine is restarted.**

```
sudo systemctl enable mysql
```
